RACING RECLINABLES FOR THE CRUISER

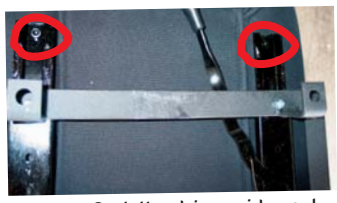
INSTALL TIME: 45 minutes DIFFICULTY 1 out of 5

Corbeau A4 Seats

TOOLS NEEDED: Ratchet, sockets (13mm), (14mm)

The stock Cav seats really bother us. They're not comfortable, and they hurt our backs. OK, you caught us. They're not that bad. We're just making up excuses to get the Corbeau A4 seats we saw on the Racing Seats USA Web site (www.racing-seats-usa.com). Just a small interior upgrade like the seats makes a huge difference in the car's appearance. They're easy to install, too, which is always great.

01 The Corbeau seat sliders and brackets come pre-assembled so that takes away 80 percent of the headaches. That makes us happy.



02 Grab the driver-side seat (recline lever on left) and bracket (seatbelt bracket on right) and line them up. Slide the bracket back and use the two included hex-head bolts to fasten the bracket to the bottom of the seat.

03 Slide the bracket all the way forward and use the other two included hex-head bolts to fasten the rear.

04 Get in the car and slide the seat all the way back. Loosen the two 13mm nuts in the front. Watch out for trash.

05 Slide the seat all the way forward and loosen the two 13mm nuts on the back.

06 Before you pull the seat out, unplug the seatbelt sensor.

07 It's amazing what you can find under your seats—enough to buy something to eat on a value menu.

08 Use a 14mm socket to remove the seatbelt from the stock seat.

09 Transfer the seatbelt to the Courbeau bracket. We had to trim the rubber a bit, but it wasn't a big deal.

10 Bring the Corbeau seat into your car and plug in the seatbelt again.

11 Slide the seat back and tighten the two front 13mm nuts.

12 Then slide the seat forward again to tighten the two rear 13mm nuts.

13 You're halfway done. Now you gotta do the passenger seat.

Price List

	MSRP	HOOK UP
Corbeau A4 Seats	$598 (pair)	$465
Corbeau Sliders and Brackets	$178	$132.40
TOTAL	**$776.00**	**$597.40**
